

1) Welcome, Admin

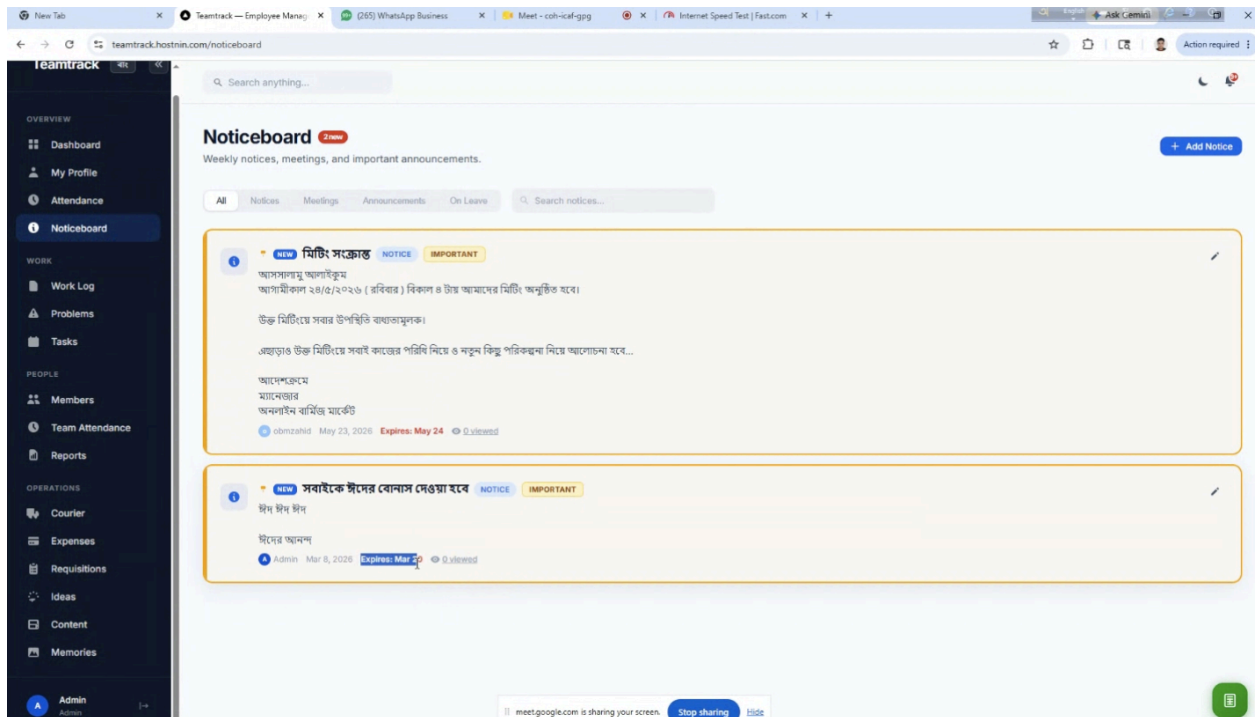

Lets improve the “Admin and Team Member” color. Maybe move to top so it looks better and make the color white.

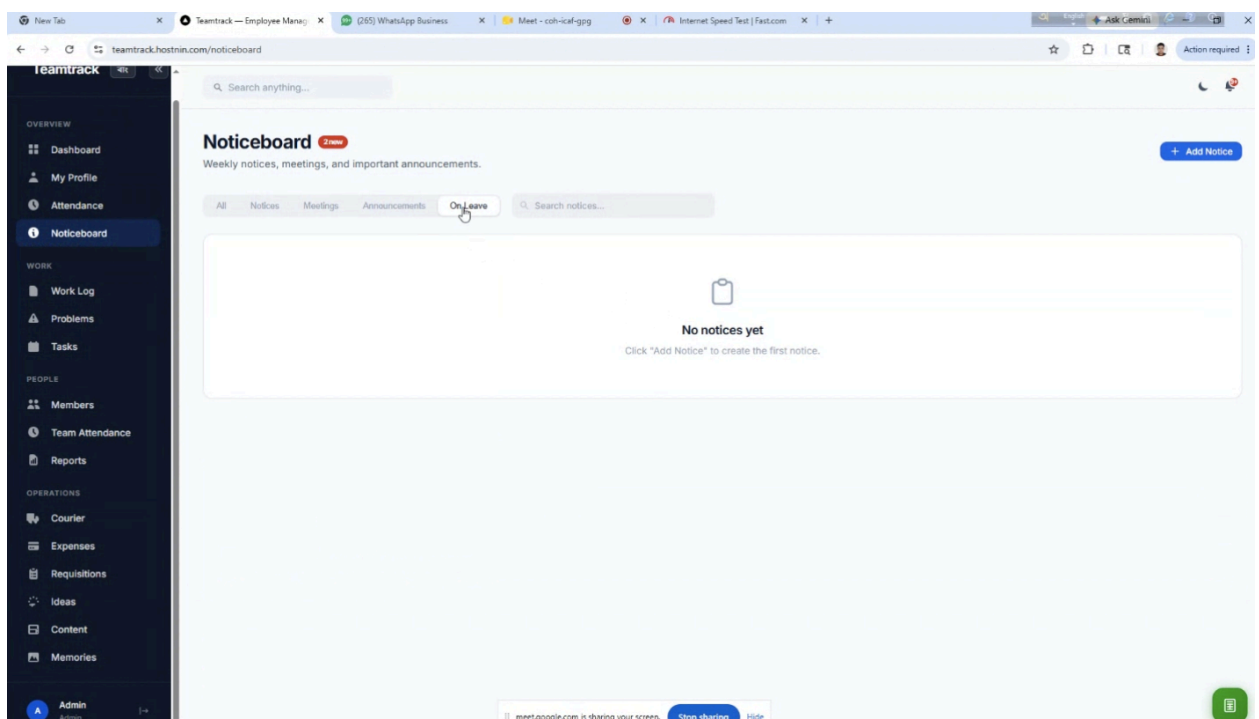

2) I have tested applying for leave as a member and it is showing submitted though when i checked it from the admin panel, it showed no pending leaves.

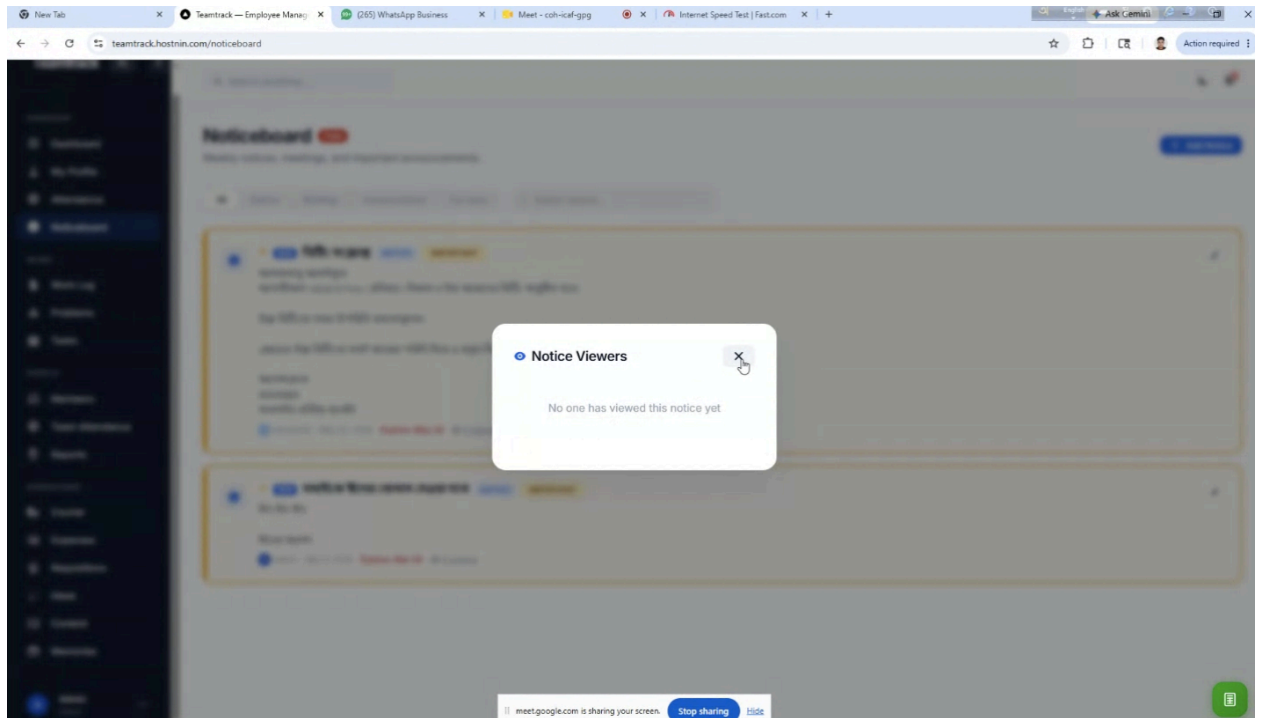

- 3) Regarding the notices in the noticeboard, there is a badge with “New” and there is a timeline of notice expiring but with an even date of expiration- it showing as new and not showing “Expired” or not.

- 4) In noticebard. There should show who is on leave now, i haven't tested yet but i want you to cross check are these working or not.

- 5) In noticeboard views option, the view isn't counting. Even after seeing 5 member manually as test, i see views showing as zero. need to work on this.

6) In Problem box,

The screenshot shows the 'Problem Details' modal for problem PRB-0054. The modal is titled 'PRB-0054 Problem Details' and has a close button. It contains the following fields and sections:

- Status: 'Resolved' (dropdown menu) and Priority: 'High' (dropdown menu). There is a 'Pick' button next to the priority dropdown.
- CUSTOMER: 'sydhul 2' with ID '81398802588'.
- PROBLEM DETAILS: 'parsel bul'.
- Category: 'Wrong Product' (indicated by a red bar).
- RESOLUTION NOTE: A text area with the placeholder 'Add a resolution note (optional)...'.
- Assign Solver: A dropdown menu with 'Select solver'.
- ACTIVITY LOG: 'No activity recorded yet'.

This screenshot shows the same 'Problem Details' modal as above, but with an additional dialog box overlaying the 'RESOLUTION NOTE' section. The dialog box is titled 'Changing status to: Resolved' and contains a text input field with the placeholder 'Why are you changing to Resolved? (required)'. There are 'Cancel' and 'Confirm Change' buttons at the bottom of the dialog box.

7) In problems page, there is a date filtering option to view by date and weekly or monthly but in task page, its missing. We need to work on this. Add a search option for task manager page as well. For problem there is a unique number for each entry, we need it for the tasks as well.

- 8) In task manager, we need to make it like content page. Adding bulk task together so we can do it faster. Also for each task, there should be a unique number.
- 9) In task page, there is a problem. When someone ads a task or edit or change status of it. Each time 5 points are adding while itn should only add when completing that task.
- 10) In member management date of birth and gender isn't saving properly, we need to tackle this properly.

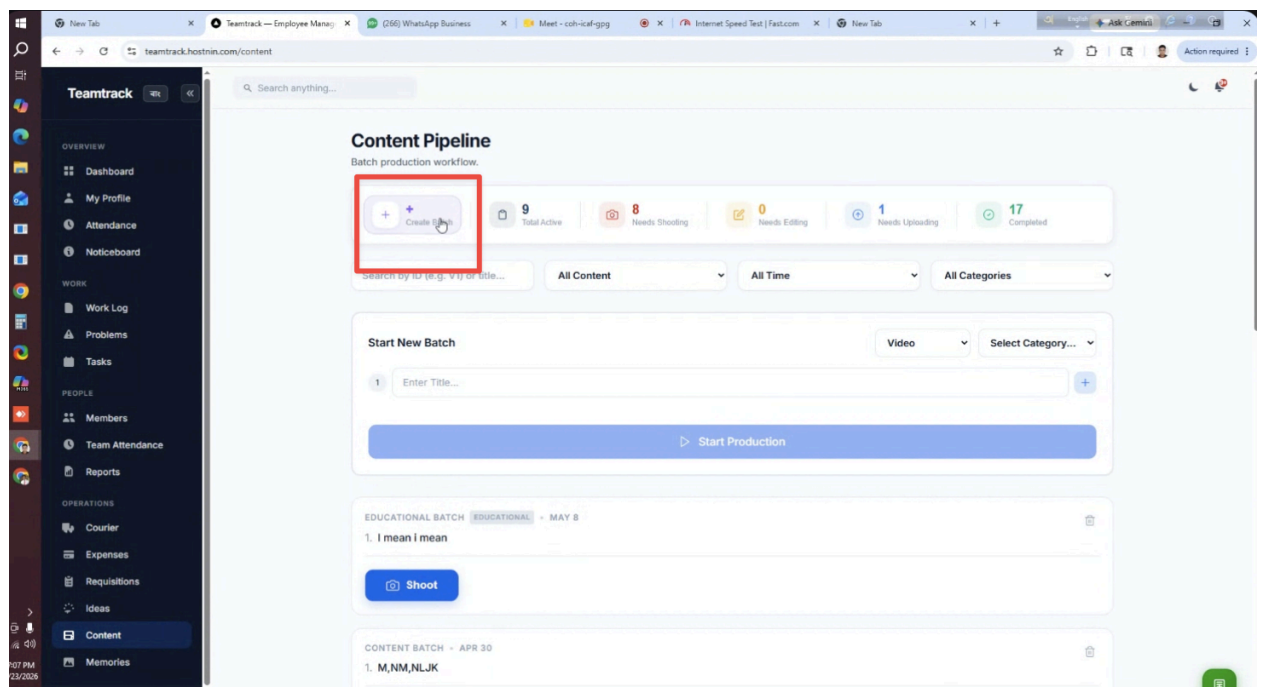

- 11) In members page, admin and super admin could have capability to edit, deactivate or even delete members including creating accounts.
- 12) In courier when we report an issue, entry isn't working properly. We need to fix this. Also for courier, there should be a specific number for courier each issues.

13) In ideas page, there should be date filtering like other page, search option and also a unique number for each ideas.

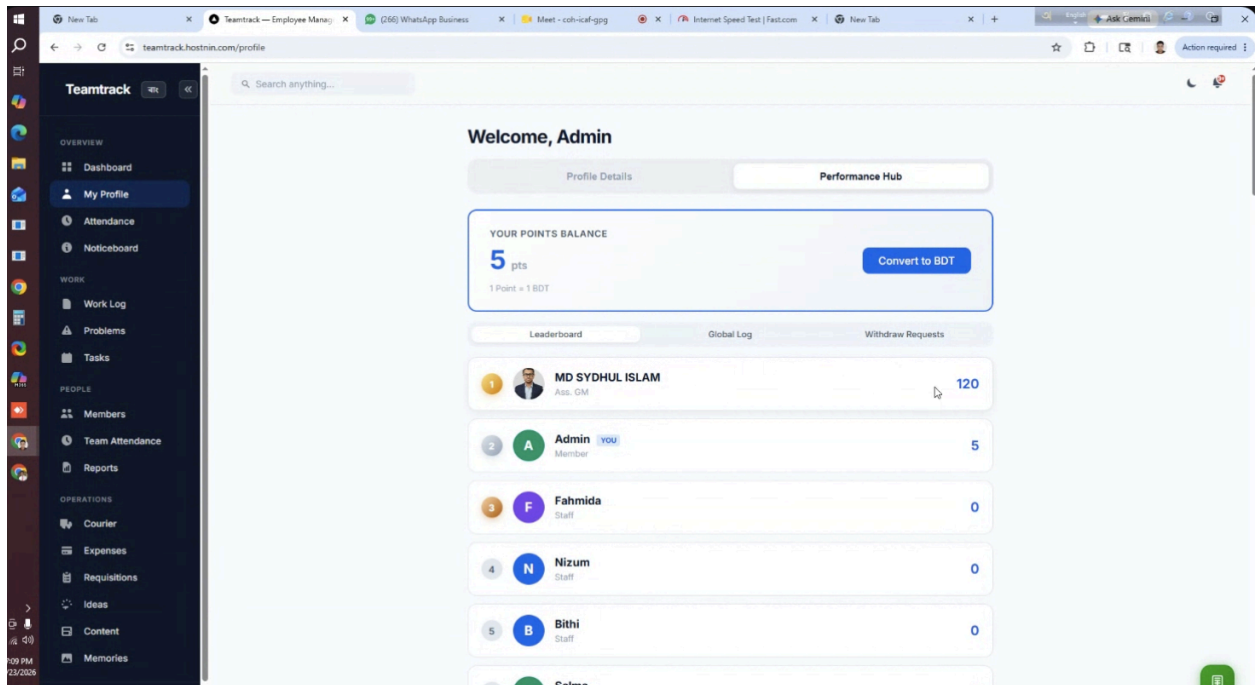

14) In content page when clicking on Plus icon, nothing happening.

15) Memories isn't functional, need to Add cloudflare R2,

- 16) In performance hub, there is no filtering of date or something. There should be filtering option so we can view by date when he done how much based on specific date, weeks or month or even year.

- 17) In performance hub when we clicks on a member profile, there should be show what he done on that specific timeframe. Lets say if it set for daily, it should show the performance based on that day. I mean what he done and points breakdown showing the tasks.

18) The calculator is cropping, need to fix
